To Whom It May Concern:

It is my pleasure to write this letter of recommendation for Devin Baughman. He is a current student in the Associate Degree program in Network Administration. During his time at Wenatchee Valley College he has proven himself to be an outstanding student. He has shown very good networking skills and has always put in the extra time necessary for success in the program. Devin is very diligent and works very well with other students in setting up lab exercises. These exercises attempt to simulate actual networking environments the students may find in the field. They setup and configure both client and server computers and take turns administering the network. Devin always goes the extra mile in figuring out problems and is willing to share his solutions with the other students. The coursework in the Network Administration program maps to industry certifications such as CompTIA A+, Network+ and Microsoft MCSA.

In addition to the “hands on” component of the class, Devin has proven to be up to the challenge of the academic rigors of the coursework. He is at the top of the curve on any test that he takes. I believe he would be an outstanding addition to any organization. Every once in a while I have a student who really impresses me. Devin is definitely one of those students. Feel free to contact me personally if you have any questions.

Sincerely,

David Burns
